

Software Technology Exchange Workshop STEW 2016

Linköping 12-13/10 2016

Swedsoft cordially invites you to present and showcase the results of an industry related research project at the Fifth Software Technology Exchange Workshop (STEW). The workshop will take place October 12-13 2016, at LIU in Linköping. **We will focus on Best of Swedish industry-academia joint research in software intensive system 2015-2016**

STEW - General Information

The purpose of STEW is to encourage and promote cooperation between industry and academia, to visualize research results and stimulate new cooperation's in the area of software technology.

Transfer of results of academic research into real products or integrating them into industrial ways-of-working is one of the key challenges for both academic institutions and companies. Many companies today are often unaware of the existing research and many academic institutions have difficulties to disseminate their results within the industry.

To remedy this, the Software Technology Exchange Workshop (STEW) has been organized by Swedsoft to facilitate knowledge exchange and dissemination of academic results within the industry. STEW provides a forum for researchers and industry representatives to meet and learn about recent, industry-relevant research in the domain of software development. The workshop also promotes networking among academic and industrial attendees.

Areas of Interest

This year, Swedsoft seeks presentations from **Swedish industry-academia joint research in software intensive system**. You may select any project that you think provides a good example of your **industry-academia** related work. The only requirement is that the research results should have reached a level where industrial adoption becomes possible.

Presentations are 15 - 30 minutes followed by 15 minutes Q&A session. We are mostly interested in the novelty aspect of the research as well as its relevance for the industry in terms of its practical application in industrial settings.

STEW does not have any copyright requirements. Hence, presenting at STEW should not prevent the researchers from publishing the results at other conferences.

At least one researcher/ company representative will be required to attend the workshop and present the research project. We also encourage you to pair up with an industrial representative and prepare a demo of your technology, if applicable.

Important Dates

Presentation proposal	July 1, 2016
Submission of slides	September 29, 2016
STEW workshop	October 12-13, 2016

Send your presentation proposal by email to stew@swedsoft.se, including

- Title
- Speaker names
- Short description of the research project and industrial partner(s)

Workshop Organizers:

Rikard Andersson [Swedsoft/ Ericsson AB], Daniel Ståhl [Ericsson AB], Gabriel Modéus [Swedsoft], Kristian Sandahl [LIU], Anders Åström [Combitech], Helena Holmström Olsson [MAH], Fredrik Heintz[LIU].
